FAX (417)891-4399

Mr. John Bayless
Bayless Auto Salvage
1634 N. West ByPass
Springfield, MO 65803

Dear Mr. Bayless:

This letter is in response to the recent complaint investigation conducted by this office at your facility located on north West ByPass in Springfield, Missouri. The complainant alleged the improper disposal of used automotive fluids into the sanitary sewer system and into the environment.

Randy
FYI →

During investigation of the complaint, you indicated that the only fluids that were discharged into the sewer system were wash waters from floor cleaning activities and a biodegradable parts washer waste. The floor drain pits also act as a collection site for oils that may accumulate on the floors and you stated that the pits were periodically pumped by Southwest Oil Company to remove accumulated oils. Oil dry is used to adsorb spilled oils from the shop areas prior to floor cleaning. The used adsorbent is placed into the dumpster for disposal.

Vehicles are initially brought into your inside shop area for removal of engine parts and collection of fluids. Waste fluids are drained into 55-gallon drums for storage until Southwest Oil Company removes them for recycling. Full drums are stored on pallets outside the shop area and small stains were noted in this area. You were advised that these stains should be occasionally removed and placed into your solid waste disposal dumpster.

Enclosed is a copy of "Pollution Prevention in the Vehicle Maintenance Industry". Use the guidance in this packet to assist you in compliance with environmental regulations.

Should you have any questions regarding this letter, please advise.

Sincerely,

SOUTHWEST REGIONAL OFFICE

Mark Rader

INVESTIGATION

Date of Investigation 6-15-98

Observation/Findings

floor sumps drain to city - say only wash waters
have inside disassembly - no floor drain - use oil/dion spills
goes to trash - have drain area for collection of oils -
goes to SWest - biodegradable wash water from parts cleaner to drain
drains are underflow type - SW sucks off top layer of oil from
cleaning activities - bottoms of oil outside - some stains here

Conclusion/Recommendations

NO VIOLATIONS NOTED - DE MINIMIS STAINS
